- Front-end and back-end development, mobile app development, API integration

Soft Skills:

- Problem-solving and debugging
- Strong work ethic and discipline

- Team collaboration and communication
- Leadership and organization
- Adaptability
- Project Manager
- Time Management
- Critical Thinking

Projects

Rentago:

A mobile app developed using React Native and Laravel that connects renters and landlords. Key features:

- User authentication and profile management
- Property listing, search functionality, and real-time user interaction
- Laravel backend with efficient database management
- Google Maps API Integration: Enables location-based rental search by saving X and Y coordinates in the database, allowing renters to visualize properties on an interactive map.

FMV Inventory Management System (Capstone Project):

A full-stack web application that manages inventory, deliveries, and walk-in sales using customer purchase orders and CRUD operations. Built with Laravel and integrated with a mobile app for real-time delivery management. Inventory Management – Add, update, and track product stocks with low-stock alerts. Key features:

- Delivery Tracking – Assign deliveries, update status, and generate reports
- Mobile App Integration: Delivery personnel use a mobile app to confirm deliveries with photo proof, similar to e-commerce platforms like Lazada and Shopee
- Walk-in Sales – Process in-store sales like a simple POS system
- Purchase Orders – Manage customer orders and update stock automatically
- Reports – Create sales, inventory, and delivery reports for business records
- Simple and Easy to Use – Built with Laravel for a smooth and user-friendly experience
